To Whom It May Concern,

Brauer Industries approximately 6 months ago attended our site to help me with a problem with our indoor pool. We were constantly getting negative feedback about the chlorine smell in our indoor pool. The boys from Brauer Industries installed 2 pieces of equipment which alleviated this problem straight away; they installed a Bluei 302 Smart Controller and an Ozone Swim Pool Purification system. Since the installation of this equipment we have not had 1 single complaint from guests and our owners and myself are extremely happy and looking forward to doing more business with Brauer Industries. I would be happy to confirm my thoughts to any perspective buyer if needed.
